

The Sectors of Indian Economy

Example

Imagine what would happen if farmers refuse to sell sugarcane to a particular sugar mill. The mill will have to shut down.

What does this show?

This is an example of the secondary or industrial sector being dependent on the primary.

Imagine what would happen to cotton cultivation if companies decide not to buy from the Indian market & import all cotton they need from other countries. Indian cultivation will become less profitable & the farmers may even go bankrupt, if they cannot quickly switch to other crops. Cotton prices will fall.

Farmers buy many goods such as tractors, pumpsets, electricity, pesticides and fertilisers.

Imagine what would happen if the price of fertilisers or pumpsets go up. Cost of cultivation of the farmers will rise and their profits will be reduced.

Examples of Economic Activities

Example

What does this show?

People working in industrial and service sectors need food. Imagine what would happen if there is a strike by transporters and lorries refuses to take vegetables, milk, etc. from rural areas. Food will become scarce in urban areas where as farmers will be ~~some~~ unable to sell their product.

Let's Work These Out

1. There are 3 sectors

* Primary * Secondary * Tertiary

Primary sector, Secondary sector, Tertiary sector all depend on each other.

Primary sector is the base of all other products that we subsequently make. Most natural products we get from agriculture, fishing & dairy, forestry

Secondary sector: then modify the products we get from primary sector.

Tertiary sector: then transport it and sell sold in market.

so all are interlinked and interdependent.

2.	Primary Sector	Secondary Sector	Tertiary Sector
*	When we produce a good by exploiting natural resources, it is ^{activity of} an activity of primary sector.	It is an activity in which natural products changed into other forms.	It is an activity which develops primary & secondary sector & supports the production process.
*	It is the first step.	It is the second step.	It is the last step.
*	It is known as 'Agriculture and related sector'.	known as industrial sector.	known as service sector.
	Ex - Mining	Ex - Construction	Ex - Pharmacy

3.	Primary	Secondary	Tertiary
	Flower cultivator	Bee keeper	Tailor
	Fisherman	workers in match factory	milk vendor
	Gardener		Priest
	Potter	Basket weaver	Cowries
			Money lender
			Astronaut
			call centre Employee

4 Yes it is useful sometimes like if someone is trying to address the the student of of std- 1, 2, 3, 4, 5, unig, lkg etc, he/she didn't have to say this much. They can ~~only~~ only say primary. Other than this I think this classification help the student to be ~~rep~~ responsible for ex- secondary - student will ~~proper~~ behave properly as they are elders & the juniors will follow their path.

3. Yes, it is helpful as it helps in estimating the Growth in GDP of the economy.

It also helps in calculating the no. of goods is produced & no. of people working in each sector.

4. Engineers

Maid

Milk man

Tailor

Shopkeeper

Doctor

Teacher

On the basis of their activities or economic activities we can classify them.
