Paragraph on pollution

Pollution means impurity. There are mainly three kind of pollutions. These are noise pollution, air pollution and water pollution.

These things are polluted for reasons

more than one. Sound of aircraft,

loud-speakers and motor horns cause

noise pollution. Air is pollution by

Smoke from factories, exhaust pipes

of vehicles and gases of industrial

units. Detergents, untreated sewage and

pesticides cause water pollution.

pollution is a dangerous thing and it

affects us in different ways. ~~Asks~~
