

HOMWORK

LIST & WRITE ABOUT ~~THE~~ TYPES OF ENERGY.

- 1★ Mechanical Energy - The energy is the energy which is possessed by an object due to its position. It can be Kinetic or Potential energy.
- 2★ Solar Energy - It is the most ~~realy~~ important source of energy. It is collected by solar panels.
- 3★ Geothermal Energy - The energy ~~that~~ that is made by the heat and water ~~of~~ in the ~~and~~ the earth atmosphere.
- 4★ Wind energy - A energi made by wind. The big fan like structure windmill runs by wind has dinema when it runs dinema converts it to electricity.
- 5★ ~~Hyd.~~ Hydropower - A Type of energy by ~~energy~~ ~~water~~ water energy.

The river flows towards some where at a ~~particular~~ particular direction so a thing like ~~the~~ windmill but it is wide and curved so when water comes the ~~wheel~~ wheel run. By dinema.

6 ★ Heat energy - is formed of energy. It is the energy in which we cook food, & keep us warm

7 ★ Light energy - A energy which helps us to see. The light energy is collected by solar panels from solar ~~no~~ energy to produce electric energy

8 ★ Sound energy - is A energy formed by every type of things like ~~ham~~ talking, vibration, chewing etc.

9 ★ Electrical energy - It is used to run fan speed, charge phone, bulbs etc.
