

Q The earth is rotating, why do we not feel this movement?

ans Earth moves very fast. It spins (rotates) at a speed of ~~1100~~ 1000 mile (1600km) per hour and orbits around the sun at a ~~speed~~ speed of 67000 miles (107,000 km) per hour. We did not feel any of this motion because ~~these~~ these speeds are constant.
