How is bamboo helpful for the ~~entire~~ environment?

Ans- Bamboo is helpful for the environment-

i) Bamboo is strong and durable -

That's why we can make bamboo furniture.

ii) Bamboo is the fastest growing plant on earth - Bamboo can grow full sized in just 3-4 months. Where other standard trees can take 30+ years to grow.

iii

Bamboo is safe and hygienic -
Bamboo fibres are naturally anti-bacterial without needing any toxic chemical treatments. That's why making bamboo toys are safe for children.

iv

Bamboo is great for the ~~env~~ environment - Bamboo forests have enormous positive benefits for the environment as this incredibly productive plant efficiently stores carbon. Bamboo absorbs 2 x more carbon dioxide than trees

and it also generates a vast amount of oxygen, totalling on to 30% more than most plants and trees.

v Bamboo is good for the community -

Lots of villagers and tribal people are completely depended on bamboo trees. They earn money from selling bamboo products.
