

Q Write some of adaptations of a camel and polar bear.

Ans Polar bear - Polar bears live in one of the planet's coldest environments, depend on a thick coat of insulated fur, which covers a warming layer of fat. Fur even grows on the bottom of their paws which protects against cold surfaces and provides a good grip on ice.

Camel - camel have hair to protect themselves from the scorching sun. They have large, flat feet to spread their weight on the sand and this type of wide foot help them to walk on sand. The hump on their back stored food and water.
