Paragraph on Television

H.V

Television was invented by the scientist J.L. Baird. It is the first electronic appliance that can be used to watch movies, different entertainment programs, news and cartoon shows. Television is a useful gadget of modern times. The News bulletin contains information on the latest developments in politics, economy, business, technology, arts, culture and sports. ~~Weather~~ Weather reports with the different detailed maps are also included in the news broadcast. Apart from news channels there are educational programs. There are also programs in trade, education, music, dance and different entertainment shows for both old and young. However it is sometimes called as 'Idiotic Box' because it increases the unhealthy habit of children for watching extended periods of time. Secondly it makes the school going children addict of it which causes their wastage of valuable time and making them lazy by not doing any physical exercises.
