

Stimulus → Receptor → Sensory neuron

↓  
Interneuron in spinal cord

Response ← effector ← Motor neuron

How  
26/1/21

① What do you mean by nervous coordination?

ans → The coordination brought about by the nervous system.

→ It consists of brain, spinal cord, nerves and sense organs.

② Define reflex action and reflex arc.

ans → Reflex action :

It is the case involuntary movement of voluntary organs.

Reflex arc :

The path through which the nerve impulses ~~from~~ involve ~~in~~ reflex actions.
