

## Ch-5-Solids, Liquids and gases

- |                                  |                                      |
|----------------------------------|--------------------------------------|
| 1. Matter                        | } 13. flow more easily than liquids. |
| 2. Molecules                     |                                      |
| 3. Solid                         |                                      |
| 4. liquid                        |                                      |
| 5. gas                           |                                      |
| 6. Volume                        |                                      |
| 7. Fixed shape                   |                                      |
| 8. Fixed volume                  |                                      |
| 9. Can be poured                 |                                      |
| 10. Can flow                     |                                      |
| 11. agarbatti                    |                                      |
| 12. fill the space of the vessel |                                      |
