

Oral question

1. Cactus is a desert / aquatic / terrestrial plant.
2. In marshy / desert / hilly areas the soil is clayey and sticky.
3. Duckweed and water lettuce and underwater / fixed / floating plants.

2. The roots of the plants of the grass family help to conserve soil. How?

A Plants of the grass family have a fibrous root system and not a tap root system. Fibrous roots spread through the soil and help to hold the soil more firmly than tap roots. This helps prevent washing away of soil and thus, help in conserving soil.
