

homework

5. Write some of the adaptations of camel and a polar bear.

- A. • Animals like Polar bear and Arctic foxes live in cold regions.
- they have fur on their bodies to keep them warm.
 - the fur on the skin of a polar bear keeps it warm and helps it to live in cold areas.
 - They have fat under the skin to be used as food in winter.

camel

- The skin of desert animals is thick and not very hairy.
- It protects them from the heat of the sun.
- The thick and less hairy skin of a camel protects it from the scorching heat of the desert sun.
