a. Why Icebergs are dangerous for ships?

AND

b. Why ~~is~~ More people live in the south of Greenland than in the north. Why do you think this is so?

Answers

a. Icebergs are dangerous to us because when they float most of its part are in the ocean or sea and a less amount is visible at the top. So ships gets hit to the parts of icebergs which are underwater, that is what it is dangerous for ships.

b. I think, southern Greenland is the warmest part of Greenland and it is very much developed also and people can survive there better the tundra region of Greenland that is why more people live in the south of Greenland than in the north.
