Write a paragraph on Banyan tree.

The 'National tree of India' is the 'Banyan tree'. This tree is extremely high and exceptionally enormous tree spreading tree. The banyan tree is huge from outside and sends new shoots from its underlying foundations, making the tree a knot of branches, root and trunks. The leaves of the banyan tree are large, leathery, glossy green and elliptical in shape. Banyan trees are discovered all over tropical and sub-tropical pieces of India, Pakistan and Bangladesh. The address the biggest trees on the planet by overhang inclusion. The biggest banyan tree in India lives at the Indian Botanical Garden in Shibpur, Howrah in West Bengal.
