

# The story of village palampuri

## Exercises

- (1) (a) location:- Bulandshahr District, western Uttar Pradesh  
(b) Total area of the village:- 226 hectares  
(c) Land use:- 26 hectares

(2) Yes, It is correct to say that modern farming methods require more inputs which are manufactured in the industry. It is because modern farming methods use a high-yielding variety of seeds. These seeds require both chemical fertilisers and pesticides, agricultural implements like tractors and proper irrigating facilities like electric tube wells.

(3) The spread of electricity helped the farmers of palampur as it helped in the transformation of the irrigation system of the village. The farmers earlier used portable pumps to draw water from wells and irrigate small fields.

(4) It is important to increase the land under irrigation because farming is the main source of income for the maximum part of the population in India and only less than 40 percent of the land is cultivable in the country.

(5)

Area of land cultivated	Number of Families
0	150
less than 2 hectares	240
more than 2 hectares	60
