

Exercise - 12CH)

A. Convert into millilitres

1. 3 L = $\boxed{3000}$ ml

$3 \times 1000 = 3000 \text{ ml}$

2. 4 L 125 ml = $\boxed{4125}$ ml

$4 \times 1000 + 125 = 4125 \text{ ml}$

3. 6 L = $\boxed{6000}$ ml

$6 \times 1000 = 6000 \text{ ml}$

4. 5 L 225 ml = $\boxed{5225}$ ml

$5 \times 1000 + 225 = 5225$

5. 7 L = $\boxed{7000}$ ml

$7 \times 1000 = 7000$

6. 16 L 440 ml = $\boxed{16440}$ ml

$16 \times 1000 + 440 = 16440$

7. 12 L = $\boxed{12000}$ ml

$12 \times 1000 = 12000$

8. 24 L 575 ml = $\boxed{24575}$ ml

$24 \times 1000 + 575 = 24575$

9. 15 L = $\boxed{15000}$ ml $15 \times 1000 = 15000$

10. 32 L 340 ml = $\boxed{32340}$ ml

$32 \times 1000 + 340 = 32340$

B. Convert into litres.

1) 3000 ml = $\boxed{3}$ L $\boxed{0}$ ml

$3000 \div 1000 = 3 \text{ L}$

2) 6666 = $\boxed{6}$ L $\boxed{666}$ ml

$6666 \div 1000 = 6 \text{ L } 666 \text{ ml}$

3) 9000 ml = $\boxed{9}$ L $\boxed{0}$ ml

$9000 \div 1000 = 9 \text{ L}$

4) 6808 ml = $\boxed{6}$ L $\boxed{808}$ ml

$6808 \div 1000 = 6 \text{ L } 808 \text{ ml}$

5) $8000 \text{ mL} = \boxed{8} \text{ L } \boxed{0} \text{ mL}$

$8000 \div 1000 = 8 \text{ L}$

6) $7045 \text{ mL} = \boxed{7} \text{ L } \boxed{045} \text{ mL}$

$7045 \div 1000 = 7 \text{ L } 45 \text{ mL}$

7) $1375 \text{ mL} = \boxed{1} \text{ L } \boxed{375} \text{ mL}$

$1375 \div 1000 = 1 \text{ L } 375 \text{ mL}$

8) $8075 \text{ mL} = \boxed{8} \text{ L } \boxed{75} \text{ mL}$

$8075 \div 1000 = 8 \text{ L } 75 \text{ mL}$

9) $8400 \text{ mL} = \boxed{8} \text{ L } \boxed{400} \text{ mL}$

$8400 \div 1000 = 8 \text{ L } 400 \text{ mL}$

10) $9090 \text{ mL} = \boxed{9} \text{ L } \boxed{90} \text{ mL}$

$9090 \div 1000 = 9 \text{ L } 90 \text{ mL}$
