

FORCE, WORK AND ENERGY

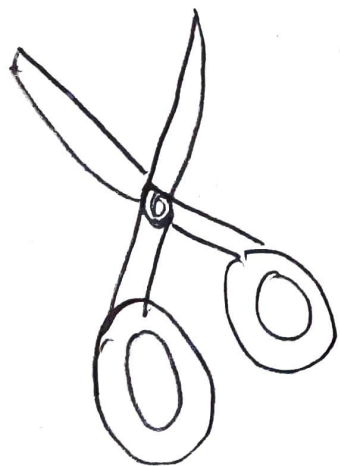

TYPE OF SIMPLE MACHINE AND ITS USES =

- Pulley : A Pulley is made from a wheel and a rope. It is used to lift things easily. Villagers use pulleys to draw water from wells.

screw - : A screw looks like a nail with grooves cut into it. it is used ~~to~~ used to hold things together.

Lever - A Lever is used to lift weights, cut things and open lids. Scissors and bottle openers are examples of Lever. A small child lifts up a beaver child on a see-saw which is also a type of Lever.
