

HW
1/7/21

Q. We always need to store liquids in containers, why?

Ans - In liquids the molecules are loosely packed so they can flow easily that's why we always need to store liquid in a container.

HW
2/7/21

Q. The smell of a perfume spreads very quickly from one corner of room to the other?

Ans. - The smell of the perfume spreads very quickly from one corner of the room to the other because the molecules in gases are very loosely packed and gases flow easily.
