

### Oral Questions

Choose the correct answer.

1. Cactus is a desert / aquatic / terrestrial plant.
2. In marshy / desert / hilly areas the soil is clayey and sticky.
3. Duckweed and water Lettuce are underwater / fixed / floating plants.

Q. Roots of the grass family helps to conserve soil. How?

Ans. The plants of the grass family have fibrous root.

- These roots spread through the soil and help to hold the soil more firmly.
- This helps protect from soil erosion and conserve the soil.
