

Write some of the uses of solar energy.

The energy that we get from the sun is called as solar energy.

This solar energy can be changed into heat energy, light energy and electrical energy.

Solar cooker

A solar cooker is a device which uses the energy of direct sunlight for cooking the food.

Solar cell

We use solar cell to get electrical energy and light energy.

Solar water heater

We use solar water heater for heating the water with the help of solar Thermal collector. We use the heat water for bathing, washing, cleaning, drinking etc.
