## Chapter-12

Air, water and weather

Q. Should we waste water? Why or why not?

(State the reason in your notebook)

Ans. We should not waste water because humans, animals and plants all need water to live. We use water to drink, bathe, wash, irrigate fields and for many other purposes. About 71 per cent of the Earth's surface is covered with water. The sea water is not suitable for our use as it is salty. Only 2% of water are there in the Earth which is suitable for use of human. If we waste water, we will face a great difficult in future. Therefore we should not waste water.
