

2. Water is a renewable resources, yet, we always told to save water. Why this is so?

Ans - water is a renewable resource but we need to save it because:

- (a) Only 2% of the Earth's fresh supply of water is there.
- (b) Demand of water is increasing due to population.
- (c) Many water resources like rivers, ponds, lakes etc. getting polluted.
- (d) over use of water leads to water shortage.
- (e) Many places receives low rainfall.

Why is it important to save water?

Ans - Humans, animals and plants all need water to live. We use water to drink, bathe, wash, irrigate fields and for many other purposes. The sea water is not suitable for drink as it is salty. Only 2% of water are there in the Earth which is suitable for use of human. If we would not save water we will face a great difficult in future. So, it is important to save water.
