

12) The Average of the first 9 numbers =

i. The sum of 9 numbers = $21 \times 9 = 189$

P)

The Average of the last 3 numbers =

i. The sum of 3 numbers = $17 \times 3 = 51$

So the average of 12 numbers =

$$\frac{189 + 51}{12} = \frac{240}{12} = 20$$

Ans.
