Delhi is further away from the Equator than Chennai. But summer in Chennai is not as hot as in Delhi. What are the reasons for this?

Ans: The climate of a place is affected due to the various factors, these are:

- o Latitude
- o Height above sea level
- o Distance from the sea
- o Wind and humidity

→ According to this question, Delhi is further away from the Chennai. But summer is not as hot as in Delhi, because Chennai is situated on the sea coast, which makes its climate moderate.
