

① Cells of plant tissue have cell walls. Cells of animals don't have cell wall. These tissues require less energy & maintenance as plant don't require movement. Due to extensive body mobility these tissue require more energy & maintenance.

② Meristatic Tissue

Permanent Tissue

→ The cells can divide further

→ The cells can't divide further.

→ Always living cells. → Some are living whereas some are non-living cells.

③ 4 tissues are :-

→ Connective Tissue

→ Epithelial Tissue

→ Muscle Tissue

→ Nervous Tissue.

④ Blood is considered a connective tissue because it has a matrix.
