Ex-13)

19. Clinical thermometer is the instrument to measure the temperature of persons.

- 20. i) melting ice = 0°C
- ii) boiling water = 100°C

21. Clinical thermometer is the instrument to measure the temperature of persons. It is used to measure temperature of patients.

Q. When we touching an object that hot or cold, Here, we are measuring how much hotness and coldness is called temperature.

1. Degree Celsius or degree Centigrade:

It was given by the Scientist Anders Celsius.

2. Degree Fahrenheit: It is named after the name of the Scientist G.D. Fahrenheit.

Q. Ice point The freezing point of water

Steam point: The boiling point of water

Q. One degree on Celsius scale is equal to

~~one degree Kelvin.~~ 1.8 degree

on Fahrenheit scale.

Q. Laboratory thermometer is used in lab to measure the ^{temperature} ~~object~~ of an object.

2. Clinical thermometer is used to measure the temperature of persons.
