Q. The push or pull of an object is called force.

Q. The force which acts on bodies of making an actual contact, is called contact force.

Examples :- The pushing and pulling the chain, The pushing of a box, the force of tension in a string when a load is suspended from it, etc.

Q. Non-contact force. Examples are gravitational force, magnetic force and electrostatic.

Q. <sup>the</sup> Between two charges ~~attract~~ bodies ~~at~~ at a distance either repel or attract each other.
