Sonu is a careless boy who hates hard work. His mother always advised him to work hard but he disobeyed. He always wanted to get rich when he grew up. Later, when he was in his middle 20s, he joined a bad company getting a lower post. He became a pickpocket. He was arrested and sent to the jail. His mother was very ashamed of him hence she left the village. Sonu repented in jail. He was later released. He went to the village but couldn't find his mother. He worked really hard and became a rich man. He got a bad news. He heard his mother was in her death bed. So, he rushed to see her at once. He worked late and found his mother had already died. He thought that he couldn't make his mother happy while she was alive. And he later recognised that the one and only key for success is none other than hard work.
