

## Revision Home assignment

1. i) Sum of  $20^\circ$ ,  $70^\circ$  and  $90^\circ$  is  $180^\circ$

Hence, it is possible.

ii) Sum of  $40^\circ$ ,  $130^\circ$  and  $20^\circ$  is  $190^\circ$

Hence, it is not possible

iii)  $60^\circ$ ,  $60^\circ$  and  $50^\circ$  sum is  $170^\circ$

Therefore it is not possible

iv)  $125^\circ$ ,  $40^\circ$  and  $15^\circ$  sum is  $180^\circ$

Therefore it is possible

2. Since the three angles of a triangle are equal and their sum is  $180^\circ$

Therefore each angle will be  $\frac{180^\circ}{3} = 60^\circ$

3. Since the sum of angles of a triangle is  $180^\circ$ .

$$\angle A + \angle B + \angle C = 180^\circ$$

$$\Rightarrow 45^\circ + 75^\circ + \angle C = 180^\circ$$

$$\Rightarrow 120^\circ + \angle C = 180^\circ$$

$$\Rightarrow \angle C = 180^\circ - 120^\circ = 60^\circ$$
