classmate

Date _____

Page _____

4 (a) $242 + 406 = [500, 600, 700]$

(b) $2415 + 1051 - 366 = [7000, 8000, 9000]$

(c) $4745 - 1828 = [2000, 3000, 4000]$
5000 2000

(d) $9912 - 6824 = [2000, 3000, 4000]$

(e) $878 \times 98 = [85000, 90000, 92000]$
 $900 \times 100 = 90000$

(f) $2488 \times 18 = [30000, 40000, 50000]$
 $2000 \times 20 = 40000$

5. Rounding off 37 and 21 to their greatest way

$37 \rightarrow 40$

$21 \rightarrow 20$

$40 \times 20 = 600$

So, 21 cassettes will cost about ₹600

6. Rounding off 9846 and 6248 to the nearest

thousand

$9846 \rightarrow 10,000$

$6248 \rightarrow 6,000$

$10,000 - 6,000 = 4,000$

So, about ₹4,000 is left with rohan.

Ex. Rounding off 3415 and 2756 to the nearest

to thousands

$$3415 \rightarrow 3000$$

$$2756 \rightarrow 3000$$

$$\text{So, } 3000 + 3000 = 6000$$

So the total amount of water in two tanks is 6000l
