

LIFE

WHY WE MUST SHIFT

WITHOUT

TO A NEW ENERGY FUTURE

OIL

A world without oil would be advantageous ~~an~~ and
 well ~~it would~~ as disadvantageous. If oil disappears, ~~and~~ ~~out~~,
 within five days, fuel terminals across the world
 will be closed. Terminals from which several trucks

used to have with grocery will be sitting
idle without the oil. The space satellites will
become space junk without oil. Bolivia,
which
from ~~with~~¹ most efficient batteries come ~~from~~
will prosper without oil as it has ~~most~~^{many} very
efficient batteries that will help it ~~run~~
without oil. ~~It~~ However, it will be good for the
environment. as the cars ~~we~~ have to rely ~~on~~
electricity. ~~More~~ More people will rely ~~on~~ public
transport. The earth will begin to heat from
human caused climate change. This will
be very beneficial for us as well as the environment.
Meanwhile our technology will be advanced enough to make electric
so, it will be beneficial for us if the world runs out
of oil
