Explain the significance of the title 'A Truly Beautiful Mind'.

ans - A beautiful mind keeps on thinking about the services it can provide to the whole of humanity. Albert Einstein certainly possessed a truly impressive mind. His works always aimed at securing, or ~~or~~ saving guarding human existence and humanity. An instance that illustrates his quality comes from the time of the second world war, in which he strictly condemned the creation of atom bombs. This was because he was aware of the huge destruction that this type of weapon could bring to humanity. Einstein has illustrated multiple examples which express his definition of truly impressive mind throughout the whole story. Therefore, the title given by Albert is very appropriate and expresses the following idea - "A truly beautiful mind is one that cares for humanity and serves for its benefits."
