Paragraph on Banyan Tree

The tree of nation is one of the images of pride necessary for the country's personality. Being local to that nation adds to the tree's special status to be considered a public image.

The public tree of India is Banyan tree, the tree is revered as consecrated in Hindu way of thinking. The actual size of the banyan tree makes it an environment for an enormous no. of animals. For a long time, the banyan tree has been an essential issue for India's town networks. The existence of a banyan tree is considered an everlasting tree. Banyan trees are discovered all over tropical and sub-tropical parts of India, Pakistan and Bangladesh. The biggest Banyan tree in India lies at the Indian Botanical Garden, in Shillpur, Howrah W.B. It is around 25m tall, and its shelter covers around 420m with more than 2000 elevated roots.

Banyan are perhaps the biggest trees on the planet and grow up to 20-25m with branches spreading up to 100m, it has an enormous trunk that has smooth greyish earthy coloured bark and is fluted.
