

HOME ASSIGNMENT

Q1) An ecosystem is a community of living organisms interacting with each other and their non living environment. It balances the nature.

Q2) Done

Q3) Each level above gets smaller, because as energy is lost as heat, there is less energy available as food for organisms.

Forest Ecosystem

- Photosynthesis
- Wind Break and Sand Fixation
- Pollutants decomposition
- CO_2 fixation and O_2 release
- Conserve wild animals & Birds
 - ↳ Decrease diseases and Pests
- Add withered leaves and grass
 - ↳ Increase ~~water~~ soil humus
- water conservation
- Climate Regulation
- Nutrient cycling
- Soil Protection
