

## ODM Connect HW

1 The environment is being polluted because

→ Burning coal to produce electricity.

→ gasses from industries and homes

→ All types of Garbages

2 The following are the health effects of air pollution are serious

→ 1/3 deaths from strokes

→ Lung cancer and heart disease

→ Air pollution penetrates our lungs, heart and brain

4.3 → Following are my suggestions to reduce environmental pollution are

→ Reduce the usage of cars & bikes

→ Use bicycles and e-vehicles

→ afforestation.

5 → It involves many diseases like asthma, lung cancer etc

→ Old people are highly affected by these diseases

→ If we don't improve the quality of air the diseases can even lead to death.

3 → We can reduce environment pollution by the following ways

→ Afforestation

→ using e-bikes and cycles

→ Using the 3R method -  
(Recycle, Reuse, Restore)
