

Homework

Q1) List some of the similarities between plant cell & animal cell.

- | | |
|---|---|
| ⇒ Plant cell | Animal cell. |
| → It is an eukaryotic cells | → it is also an eukaryotic cells. |
| → contain organelles such as the nucleus, mitochondria, endoplasmic reticulum, golgi apparatus, lysosomes, and peroxisomes vacuoles. | → It also contains organelles such as the nucleus, mitochondria, endoplasmic reticulum, golgi apparatus, lysosomes, and vacuoles. |

Q2) List some of the ^{difference} similarities between plant cell & animal cell.

- | | |
|----------------------------------|--------------------------------|
| ⇒ Plant cell | animal cell. |
| → It has a cell wall | → it doesn't have a cell wall. |
| → It has chloroplast | → But it doesn't have. |
| → Plant cell have larger vacuole | → It has smaller vacuoles |
| → It has plastids | → But it doesn't have. |
