Why earth is only a living planet and others are not?

Ans- Earth is only a living planets. Because conditions favourable to supporting life are only to be found on earth. The earth is neither too hot nor too cold. There are water and air in it, which are very important for our ~~survival~~ survival. ~~Earth is a~~ Water covers 70 percent of Earth's surface. Earth's atmosphere is made mostly of nitrogen and has plenty of oxygen for us to breathe.

That's why earth is only a living planet and others are not.
