Write a paragraph in pollution.

A- Pollution is a big environmental problem when the environment is contaminated, it is called pollution. The major types of pollution are air pollution, water pollution, soil pollution, and noise pollution. The major cause of pollution includes massive use of motor vehicles rapid industrialization, increasing urbanization, use of chemical fertilizers in agriculture, burning of fossil fuels in electricity generation. The burning of fossil fuels is the single largest cause of pollution. Pollution adversely affects the health of people. Air pollution causes respiratory diseases and other lung-related problems. Water pollution pollutes the water systems. Noise pollution impairs the auditory senses and cause stress, soil pollution decrease the crop output. The solutions to pollutions includes using alternate way for providing generation

proper treatment of industrial wastes,  
storing the rain water safely, reusing  
plastic products and using electronic  
recycle.
