

Narrate what happened when William was inside the van.

A- William's mother said he could not get out because it would mean taking furniture that had been put into the van with great effort. She found out that William was trying to get out as she heard loud sounds of material tearing and glass breaking. Mrs Brown was tired when she told the movers to make a way for William to get out of the van because she was thinking of the wasted time and effort in putting the heavy furniture in the van and of the <sup>regret</sup> of that effort. William was angry because he felt the elders were ~~thought less~~ thoughtless in shutting him up in the van with hardly any air to breathe. His mother tried to get him out of the way by suggesting

that he should go in the first  
van to new house
