

## Homework

- Define light energy. Differentiate luminous and non-luminous objects.

A- Light is a kind of Kinetic energy with the ability to make types of light visible to human eye.

### Differences Between

#### Luminous:

The bodies which have light of their own e.g. sun stars, bulb, candle, oil lamp, torch a lantern.

#### NON Luminous:

The bodies - which do not have their own light e.g. moon, chair, table when light falls on them, they become visible.
