

Geography

Q1 * According to the theory, the lithosphere is broken up into number plates which are known as lithosphere or tectonic plate.

Q2 The two types of ^{force} plates are endogenous, exogenous

Q3 Changes and movement are ~~not~~ taking changes all time. They are also different external forces working constantly and changing face of the earth

Q4 The breakdown of the materials on Earth's crust in to smaller piece is known as weathering.

Q5 The agents that are responsible for erosion are wind, water, Glaciers and gravity

Q6 According to the theory, the lithosphere broken up ^{into} number ~~time~~ of pieces called tectonic plate. There are 6 major and 20 minor plates which float independently. This cause the movement of the earth.
