2.

Let the amount of salt be x g.

The amount of solution = $240 + x$

$$\frac{x}{240+x} \times 100 = 24$$

$$\Rightarrow 100x = 24(240+x)$$

$$\Rightarrow 100x = 5760 + 24x$$

$$\Rightarrow 76x = 5670$$

$$\Rightarrow x = \frac{5670}{76}$$

$$\Rightarrow x = 76.6 \text{ g}$$
