Cew

1. Which of the following is responsible for the variation in the colour of soil in diff. parts of India? Difference in rock formations
2. Which of the following has not been a factor in the creation and modification of India's relief features? - Population density
3. Which of the following is plausible theory presented by Earth scientists to explain the formation of continents & oceans & the various landforms? Theory of plate tectonics.
54. Acc. to theory of plate tectonics, 'the movement of the plates result in some geological activity'
Volcanic activity
48. Acc. to ^{"the theory of"} "plate tectonic" the earth's crust is formed of how many major plates? Three
6. According the "Theory of Plate Tectonics" when some plates come towards each other, which of the following is formed
Convergent boundary

- 7) Acc. to the "Theory of Plate tectonics" when some plates move away from each other, which of the following will form? Divergent boundary
- 8) In the event of two plates coming together, which of the following is not possible
The plates may collide and crumble horizontally past each other
- 9. What have been the effects of movements of plate?
All of the above
- 10. A landmass bounded by sea on three sides is referred to as Peninsula
- 11. Which of the following divisions of India have the oldest landmass? The Peninsular Plateau
- 12. The Peninsular Plateau of India is part of which of the following landmass? Gondawana land
- 13. Which of the following country/continents was not a part of ancient landmass of Gondawana land? Europe

- 14. The northward drift of the Indo-Australian plate resulted in its collision with the much larger Eurasian plate. Which of the following was the result of the collision? India and Australia were formed
- 15. Physiographic divisions of India formed out of accumulations in the Tethys geosyncline?
The Himalayas
- 16. The Himalayan uplift out of the Tethys Sea subsidence of the northern flank of the peninsular plateau resulted in the formation of a large basin. Which of the following physical divisions of India was formed due to filling up this depression?
The Himalayas
- 17. Geologically, which of the following physiographic divisions of India is supposed to be one of the most stable land block
The Peninsular Plateau

Ceo

18. The Himalayan Mountains
19. The Himalayas
20. The Himalayas
- 21) The Himadri
- 22) The Himadri
- 23) Kanchenjunga
- 24) Khyber pass
25. Himachal
- 26) Kamet
- 27) The Shiwaliks
- 28) The Shiwaliks
- 29) Duns
- 30) Kumaon Rivers
- 31) Javadi hills & Shevroay Hills
- 32) Lakshadweep
- 33) Pass
- 34) Both A & R are true & R explain A
- 35) Mizoram
- 36) Eight Jumps
- 37) Both A & R are true & R explain A
- 38) A is false but R is true
- 39) 1st, Bhutan, Meghalaya, Gulf of Marree
- 40) ~~Dun~~ Dun
