

River

Date _____
Page _____

River is a source of water.

Rivers are of two types →

Seasonal rivers and perennial rivers.

Perennial rivers are formed

from glaciers, for ex: Ganga arises

from Gangotri glacier. Seasonal

rivers are formed from ponds

or lakes, for ex: Narmada originate

from Amarkantaka Plateau in

Chhatisgarh. Most of the early

civilisations have formed in and

are around river valleys. The Indus Valley civilisation was formed around the Indus and Saraswati rivers. ~~The~~ ~~But~~ The places around river are sometimes affected by heavy flood but they deposit rich amounts of silt in the farms which make the soil fertile. Therefore, rivers are a very helpful part of our lives.

Diwali

Diwali is a Indian festival. It is also called the festival of light.

It is celebrated with crackers and diyas. People burst crackers ~~are~~ and light there home with candles and diyas. They blow sky lanterns. People exchange of sweets and wore new dress.

It is my favorite festival because we get many, many and many chocolates for gifts. 😊
