

Ex: 7D

5) No. of Rupees withdrawn by

$$\text{Sanjay} = ₹ 27,500$$

He asked for the money is

$$= ₹ 100$$

Total number of 100 ₹ Rupees

$$\text{notes} = ₹ 27,500 \div ₹ 100$$

$$Q = 275 \quad R = 0$$

$$₹ 100$$

∴ 275 notes did the bank  
give him.

Q6) ~~Mr.~~ Mr. Gandhi withdraws =

₹ 12,400

He kept aside = ₹ 4,200

So, He has = ₹ 12,400

- ₹ 4,200

₹ 12,400

- ₹ 4,200

₹ 8,200

∴ ₹ 8,200 money equally

distributed among 5 family

members.

Money equally distribute =

$$\text{₹ } 8,200 \div 5 = \text{Q} = \text{₹ } 164$$

$R = 0$

~~Family members~~

$$\begin{array}{r} \text{₹} \\ 5 \overline{) 8,200} \quad (164 \rightarrow \text{Q} \\ \underline{-5} \downarrow \\ 32 \downarrow \\ \underline{-30} \downarrow \\ 20 \downarrow \\ \underline{-20} \downarrow \\ 00 \rightarrow R \end{array}$$

$\therefore$  ₹ 164 money equally distributed among 5 family members.
