Hlw Ch-10 Force, work and energy

Def: Each type of Simple machine

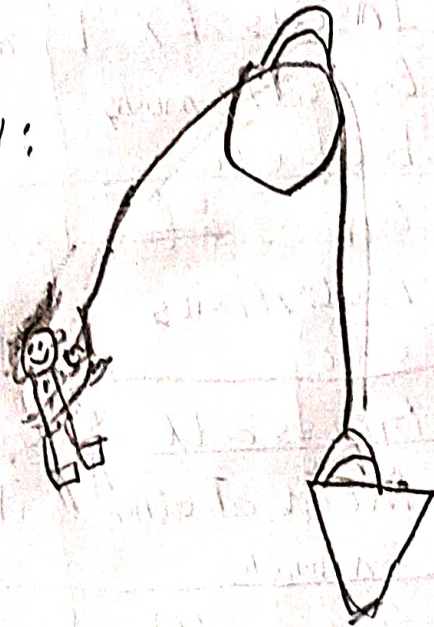

Lever:

Wedge:

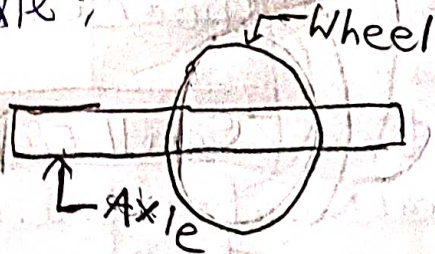

Pulley:

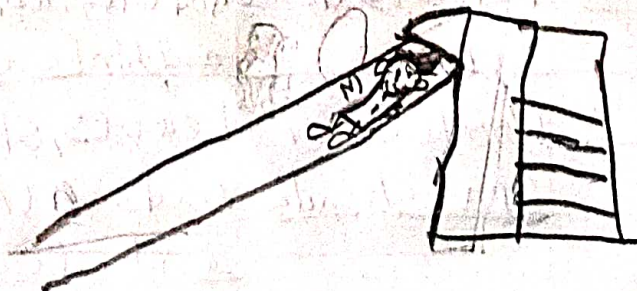

Screw:

Wheel and axle:

Inclined Plane

Uses of Lever: It is used for lifting weights, cut things and open ~~lids~~ lids.

Uses of Pulley: It is used to lift things easily, its made from wheel and a rope.

Uses of Inclined plane: An inclined plane is simply a slope ^{over} which a load can be pushed up or down. A plank of wood is often used to load heavy barrels onto trucks.

Uses of screw: A screw looks like a nail with grooves cut into it. It is used to hold things together.

Uses of Wedge: Its used to cut hard things.
