Why should we use CFL bulbs and tubelights?

23/11/21 Hlw

1. CFLs are great for smaller areas like puja room, kitchen (if it is small).
2. CFLs use less electricity than traditional light bulbs.

They reduce demand for electricity; that reduction means less greenhouse gas emissions (including less ^{mercury} ~~mercury~~ from power plants.)

CFLs contain a very small amount of mercury - an average of 4 milligrams in each bulb.
