

#1w 23/08/21

Write three points on why people <sup>of that desert</sup> use less water in compare to other parts of India

1. Because there is very less amount of water in that desert.

2. But sometimes ~~it~~ some rainfall is there in that desert but in day it <sup>quickly</sup> ~~dry~~ dry

because of so much

hot. It happens in some

3. Because in some <sup>parts</sup> places

water is there. But some

live far from that places.

And they not go in that places.
