

1. Why is the adrenal gland named so?

Sol: The adrenal gland is named so because it provides the body to fight or flee from any kind of stressful or ~~emerge~~ emergency situation or emergency.

2. Name the emergency hormone. When is it secreted?

Sol: The name of the emergency hormone is the adrenal hormone. It is secreted when the body is in a kind of danger or ~~in~~ in extreme stress or in a fearful situation or in an emergency.

3. Pancreas acts as both the exocrine and endocrine glands. Explain.

Sol: As the Pancreas acts as a digestive exocrine gland and a hormone-producing ~~exocrine~~ endocrine gland. It excretes the enzymes to break down the proteins, lipids, carbohydrates and nucleic acids in food functioning as an exocrine gland. It also secretes the Insulin and Glucagon to control blood sugar levels throughout the day while functioning as an Endocrine gland.
