

In abacus (a) above, spike T has 5 beads and spike O has 2 beads. Therefore, it represents the number 52. Similarly, in abacus (b) spike T has 4 beads and spike O has 1 bead. Hence it represents 41. In abacus (c), spike T has 7 beads and spike O has 3 beads. Therefore, it represents 73.

- Note :**
1. Please explain to the children that an abacus has spikes to represent numbers even beyond hundreds.
 2. Each spike in an abacus can have **maximum** 9 beads only. We know that one more than 9 is 10 and it is represented by 1 bead in spike H. Also, one more than 99 is 100 and it is represented by 1 bead in spike H.

Exercise

Write the number that each abacus represents.
