Why icebergs are dangerous for ships?

Ans- Icebergs appear to be tiny piece of ice floating in water but in fact it is so huge underwater. When a ship hits the iceberg accidentally, it can damage the ship and the ship may start sinking. So icebergs are dangerous for ships.

More people live in the south of Greenland than in the north. Why do you think this is so?

Ans- The south-western coast of ~~Green~~ Greenland is warmer than the rest of it. Therefore more people live in the south of Greenland than in north.
